

## AL BALANCE (V2 & V3) WEIGHT RANGES & TENSIONING GUIDANCE

AL V2 & V3 Balances are pre-tensioned to the Minimum poundage and will require tensioning by the customer if the sash weight is above the minimum poundage.

Customers will need to fit the balance and assess the rise/fall of the sash and adjust the balances themselves as necessary. V2 and V3 balances are custom made and we suggest the customer adjust the balance pair by half a turn (one click) at a time and reassess the rise/fall of the sash.

IMPORTANT NOTE:

**V2 & V3 BALANCES CANNOT BE UNTENSIONED, SO PROCEED WITH CAUTION WHEN TENSIONING**

STOCK ITEM CODE	WEIGHT RANGE	
	MINIMUM (LB)	MAXIMUM (LB)
AL1010 V2	8	15
AL1010 V3	16	23
AL2010 V2	16	23
